

# OCEAN CROSSWORD

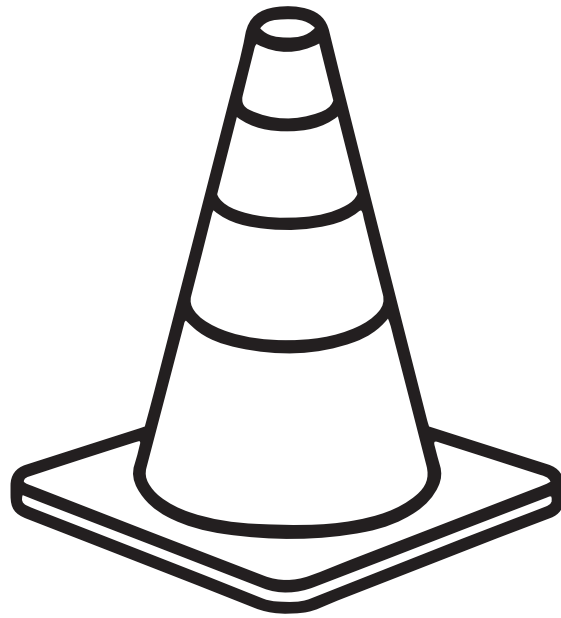

## ACROSS

5. Global system that moves heat and nutrients around the planet.
6. Delicate-looking reef fish with bold patterns.
7. Master of camouflage with one of the ocean's strongest venoms.
14. Rocky pool left behind that becomes home to small sea creatures.
16. Underwater meadows that shelter young fish and turtles.
18. Microscopic ocean life that feeds some of the world's largest whales.
19. Icy waters surrounding the North Pole.
22. Using sound clicks to locate food and objects underwater.
24. Vessel that uses wind instead of an engine.
27. Encircles Antarctica and drives global ocean circulation.
30. Rare deep-water fish sometimes mistaken for a sea serpent.
31. Includes intelligent animals like octopuses and cuttlefish.
32. Ocean water can rise and flood the coast during this dangerous event.
36. Simple ocean animal that constantly filters water for food.
37. Mixing zone where river water meets the salty sea.
40. Shellfish that swims by clapping its shells together.
42. Ocean fish that swims back to its home river to lay eggs.
43. Powerful movement that carries warm and cold water around the globe.
45. Hides in reef holes waiting to ambush prey.
46. Travel deep underwater using only the air in your lungs.
48. Unlike its relatives, this giant has a soft shell instead of a hard one.

## DOWN

1. Underwater habitat where tall algae provide shelter for many animals.
2. Global conveyor belt of currents driven by heat and salt.
3. Erupts beneath the waves and can create new islands.
4. Scientific study of everything about the oceans.
8. Sharp temperature boundary layer in the ocean.
9. Fierce storm with strong winds that forms over the Pacific.
10. Marine animal that glues itself to hard surfaces and some sea creatures.
11. Nearly transparent drifter with a mild sting and a gentle glow.
12. Known for acrobatic leaps and complex songs.
13. Massive wave triggered by underwater earthquakes.
15. Hot mineral-rich springs on the deep seafloor.
17. Steep rocky wall rising above the shore.
20. Ride on a large inflatable tube behind a boat or down a river.
21. Enjoy a vacation while traveling across the sea on a large ship.
23. Giant moving slab of Earth's crust beneath the ocean.
25. Predator that patrols coral habitats and helps balance marine life.
26. Intelligent mammal that leaps and plays in ocean waves.
28. Strong narrow current that pulls water and swimmers away from shore.
29. The world's largest underwater ecosystem, found off Australia.
31. Efforts to protect oceans and marine animals for the future.
33. Relationship where two ocean species help each other.
34. Boundary where land and sea continuously meet.
35. Changes color and shape while exploring with eight flexible arms.
38. Water sport that uses a flying sail to create speed and jumps.
39. Cleans the seafloor by eating dead plants and animals.
40. Ride the face of breaking waves on a board.
41. Area between high and low water levels along the shore.
44. Noisy seabird that soars along shorelines looking for food.
47. Spinning tropical storm that forms over warm seas.
